

Diego Galisteo Reina

Senior full-stack developer

dgalreina@gmail.com · dgalreina.com · github.com/dgalreina

Senior software engineer with 14+ years of experience building robust, scalable web applications end to end, with great attention to detail. Specialized in AI solutions based on LLMs. Strong background in full-stack development, system design and performance optimization. Used to taking projects to production and keeping them healthy over time, supporting junior developers and being a team player.

Technologies

Frontend	React · Next.js · Angular · Three.js · TypeScript
Backend	Node.js · NestJS · Python · Java (Spring)
Databases	MongoDB · SQL
AI / LLMs	LLM integration (Claude) · Prompt engineering
Other	WebGL · REST APIs · Microservices

Experience

Full-stack developer

Freelance · Madrid · May 2026 – present

Full-stack developer

Scriptum-AI · Madrid · Feb 2025 – May 2026

Development of production-ready LLM-powered applications for the legal sector.

KEY PROJECTS

Leonardo – Judicial Case Analysis Platform

- Developed an AI-powered system to analyze real court hearing videos and audio.
- Implemented pipelines for automatic transcription, summarization and structured report generation.
- Enabled extraction of key insights and case documentation using LLMs.

Scriptum Contract – Legal Document Comparison Platform

- Built an intelligent document comparison tool to detect differences, inconsistencies and critical changes.

KEY CONTRIBUTIONS

- Designed and implemented LLM integrations in production environments.
- Worked on prompt engineering and response optimization.
- Contributed to system architecture for scalable AI-driven applications.

Technologies: React, Node.js, Angular, Python, LLMs (Claude)

Full-stack developer

Nexplore (Dimática) · Madrid · clients Nexplore US and Hotchief Germany · Dec 2020 – Feb 2025

High-performance 3D visualization platform for managing large-scale datasets including point clouds, 3D models and orthophotos.

KEY CONTRIBUTIONS

- Designed and implemented core features such as measurement tools, volume calculation and advanced element mapping.
- Optimized rendering and performance for handling large 3D datasets in the browser (Three.js).
- Collaborated with international teams (US & Germany) in a fully remote environment.

Technologies: Angular, Python, React, Three.js, Node.js, MongoDB, WebGL

Full-stack developer

Mapfre (Capgemini) · Madrid · Oct 2019 – Dec 2020

NSEc, vehicle management: internal application built from scratch, starting at analysis. Led the Angular frontend, integrated REST and SOAP services and contributed to the Java (Spring) backend, in a Scrum environment.

Technologies: Angular, Java, Spring, REST/SOAP, JUnit

DSD China team coordinator

DigitalSmileDesign · Madrid · Jul 2018 – Oct 2019

Daily coordination of the Shanghai design team, frequent trips for training and management, and tools to make their work easier, in a Chinese-speaking environment.

Technologies: Visual Basic

Full-stack developer

Vintegris · Madrid · client BBVA · Jul 2015 – Jul 2018

One of BBVA's core security systems: migration to microservices, new features for critical components, SQL and MongoDB databases and internal configuration tools with Vaadin, in high-security, high-availability environments.

Technologies: Java, Spring, Kubernetes, MongoDB, SQL, Angular

Graphics developer

Continex · Madrid · client Nolve · Mar 2015 – Jul 2015

Custom graphics library with FreeType font support to replace SDL, improving rendering flexibility and performance.

Technologies: C/C++, SDL, FreeType

Web developer

Freelance · Madrid and London · Aug 2013 – Mar 2015

Websites and web applications for clients and personal projects, from development to deployment.

Technologies: HTML, CSS, JavaScript

Unity developer and technical artist

Topcells · Shanghai, China · Jul 2012 – Jun 2013

2D/3D interactive applications: gameplay systems in Unity3D and creation and integration of real-time assets.

Technologies: Unity3D, C#

Computer engineer and graphic designer

Consulate General of Spain · Shanghai, China · Dec 2010 – Oct 2011

IT infrastructure, servers, networks and website, and technical support for conferences and events, in an international environment.

Education

B.S. Computer Engineering

University of Valladolid (UVA)

Final thesis passed with honors.

Master's in Videogame Development

Complutense University of Madrid (UCM)
